

Crypto estate search log

Record every finding as a fact, inference or assumption. Use with the search workbook; never write passwords, keys or recovery words.

What was found / where	When	Fact	Inference	Assumption

Fact - something you saw or verified. Inference - a reasonable conclusion from facts. Assumption - an unverified belief. The estate's later steps are built on facts, never on hopes. Use this log with the search workbook on <https://inheritedcrypto.com>; when the search is complete, keep it with the estate file.
